INSTALLATION MANUAL

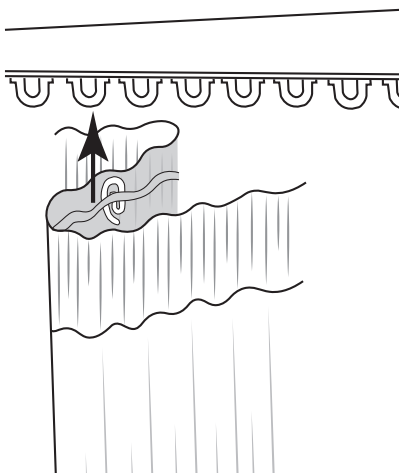

HOW TO HANG WAVE CURTAINS

OPHÆNG AF GARDINER MED WAVEBÅND

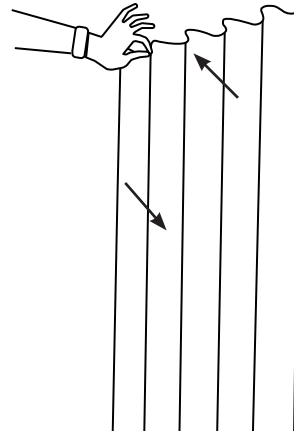

1

DK/NO/SE: Hæng gardinet op på gardinskinnen - én hægte i hver glider, brug ikke stopperne! **EN:** Hang the curtain up by attaching each hook to their designated glider.

2

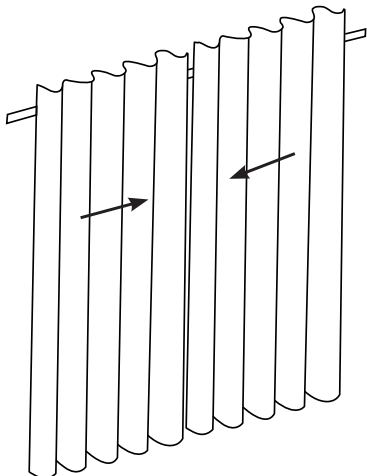

DK/NO/SE: For at lave ensartede folder skal gardinet skiftevis trækkes frem og skubbes tilbage øverst mellem hver hægte. Slut af med at trække frem. **EN:** In order to make uniform folds, the curtain must be pushed forward and back alternately between each hook. Finish by pulling forward.

3

DK/NO/SE: Test om gardinet dækker hele vinduet, når der er trukket for. Hvis gardinet ikke dækker, skal du kontrollere, at der er nok glidere i stangen, og at der er 8cm mellem gliderne. Dernæst skal du kontrollere, at der er en hægte til alle glidere. Husk at fordele hæfterne med samme afstand i Wave båndet. Hvis gardinet dækker vinduet, og der er for mange glidere i skinnen, kan overskydende glidere pilles af skinnen.

EN: Test that the curtain covers the entire window. If the curtain does not cover, ensure there are enough gliders in the track and position the gliders 8cm apart. Next, make sure there is a hook for all gliders. It is important to make sure that the hooks are evenly spaced along the Wave curtain tape. If the curtain covers the window and there are too many sliders in the track, you can remove some gliders from the track.

4

DK/NO/SE: Fold gardinet sammen i lige store folder forneden og afslut med at sætte et bånd eller lignende omkring gardinet. Lad gardinet hænge sådan i ca. 14 dage for at sikre smukke og ensartede folder. Husk at flytte båndet jævnlige.

EN: Fold the curtain in equal pleats at the bottom and finish by putting a ribbon or similar around the curtain. Let the curtain hang like this for approx. 14 days to ensure beautiful and uniform folds. Remember to move the ribbon regularly.
